PROFESSIONAL SUMMARY

Java Full Stack Developer with **4.5+ years** of experience designing, building, and maintaining scalable, production-grade web applications using **Java**, **Spring Boot**, and **Angular**. Strong hands-on experience with **REST API** design, **Microservices** architecture, **Spring Security/JWT** authentication, and event-driven systems using **Apache Kafka** and **RabbitMQ**, backed by **Elasticsearch** for high-performance search. Proven track record working in **Agile/Scrum** teams — including stepping in to lead the team in the Team Lead's absence — and collaborating directly with Onsite Leads and Product Owners to translate requirements into delivered features. Currently expanding into cloud-native and DevOps practices, gaining hands-on experience with **Docker**, **Kubernetes**, **AWS**, and **Jenkins** for containerized deployments and **CI/CD** automation.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Oracle

Aug 2025 – Present

- Build and maintain scalable web applications using **Java**, **Spring Boot**, and **Angular** within an **Agile/Scrum** delivery team.
- Contributing to the migration of legacy applications from **IBM WebSphere** to a containerized platform, deploying to **Oracle Kubernetes Engine (OKE)** clusters using **Docker**, **Kubernetes**, and **Jenkins**-based **CI/CD** pipelines.
- Contribute to **REST API** design and secure endpoints using **Spring Security** and **JWT**-based authentication.
- Collaborate with cross-functional teams (QA, Product, DevOps) to plan and deliver features each sprint.
- Write unit tests and take part in code reviews to maintain code quality and long-term maintainability.

Senior System Engineer — Infosys

Feb 2022 – Aug 2025

Project: Toolbox-Horizon — tool management platform for an aerospace client

- Built and enhanced web applications using **Java**, **Spring Boot**, **Angular**, **JSONForms**, **SQL Server**, **RabbitMQ**, and a **Microservices** architecture.
- Led the development team in the Team Lead's absence, ensuring uninterrupted sprint delivery and coordination.
- Worked closely with the Onsite Lead and Product Owner in an **Agile/Scrum** environment to gather, refine, and deliver requirements.
- Used **Apache Kafka** and **RabbitMQ** for event-driven communication between microservices, and tuned **Elasticsearch** for optimized search performance.
- Wrote unit tests using **JUnit** and **Jasmine**, managed **SQL Server** performance tuning, and deployed builds to **Azure** staging via automated **CI/CD** pipelines.
- Wrote and optimized **SQL** queries and worked with **JSON** data structures for efficient data exchange between services.
- Participated in code reviews, contributing to improved code quality and consistency across the team.
- Used **Git** for version control and day-to-day collaboration across the development team.
